Précisez l'action générale dans laquelle s'inscrit l'opération, l'objectif, les résultats attendus, la portée locale, régionale ou nationale

En 2019, la ville d'Hérouville Saint-Clair a été autorisée à procéder à une opération de stérilisation des goélands argentés qui s'étaient implantés depuis quelques années et qui provoquaient un certain nombre de nuisances.

Malgré un manque de connaissance de la population de cet oiseau et une réalisation tardive de la stérilisation, les efforts ont été assez bénéfiques. Sans doute les habitants sentant qu'ils étaient accompagnés dans leur difficulté de cohabitation avec cette nouvelle espèce, ont-ils pris une autre attitude envers lui. Notre campagne de sensibilisation a aussi porté ses fruits.

Je vous précise que sur un effectif estimé (sur la partie habitée de la ville) à 120 couples, seule une vingtaine de couples a été ciblée dans les quartiers dans lesquels nous avons reçu le plus de plaintes.

Je vous demande à nouveau pour 2022 l'autorisation d'effectuer la même opération en ciblant seulement les secteurs où les goélands sont les plus dérangeants.

Bien évidemment, j'envisage de renouveler la même campagne d'information tant auprès des habitants que des bailleurs. Les recensements pré et post opératoires sont aussi envisagés avec le Groupe Ornithologique Normand.

Analyse du risque de report de couples de goélands depuis les zones de nidification connues vers les différents secteurs adjacents :

aucun car pas d'effarouchage

Évaluation de la population totale des goélands et du ratio des impacts produits par la dérogation :

sera effectué en collaboration avec le GONM.

Population estimée à 120 couples

12 - Rapport annuel

Cette partie est destinée à recueillir le bilan de la campagne précédente. S'il s'agit de votre première demande, vous pouvez passer directement à la question 13.

Cette section remplace l'envoi du bilan de la ville mais doit être détaillée de la même façon.

Rappel de la justification de la demande N-1 :

Dernière opération en 2019

Intervention ciblée sur des secteurs similaire à 2018. Population concernée de 30 à 40 nids sur une population totale estimée à 120 couples.

Mesures de sensibilisation menée auprès des habitants et des bailleurs

Description des mesures de prévention prises pour limiter l'installation des oiseaux nicheurs (dispositifs empêchant le cantonnement des goélands, gestion des déchets...) :

communication effectuée par le biais de panneaux électroniques, site d'information citykomi, journal municipal et relayé par les bailleurs.

Ces mesures préventives ont-elles eu l'effet attendu ?

Les mesures ont permis de limiter les nuisances urbaines liées aux goelands tout en préservant au maximum leur reproduction.

12.1 - Bilan des opérations de stérilisation

Déroulement des opérations de stérilisation des œufs. Si vous n'avez mené que des opérations d'effarouchement, merci de passer directement à la question 12.3.

12.2 - Les résultats chiffrés des opérations

Seule la stérilisation des œufs de Goéland argenté (*Larus argentatus*) est autorisée, sous couvert de l'autorisation préfectorale qui vous a été délivrée. Les comptages des nids, œufs et poussins de Goélants bruns et marins doivent figurer dans des tableaux distincts, afin que le suivi de ces populations soit facilement analysable.

12.3 - Bilan de la campagne d'effarouchement

Si vous n'avez pas mené de campagne d'effarouchement, merci de passer à la question 13.

Merci de fournir le calendrier d'interventions.
