

**Photos d'implantation de l'ancienne voie ferrée Alençon Pré-en-Pail Rives d'Andaine**

This figure is a topographic map of the region between Alençon and Pré-en-Pail, showing the route of an old railway line. The map features contour lines, rivers (Mayenne, Angaine, Doitineau, Courbe), and various settlements including Couterne, Antoigny, St-Ouen-le-Brisoult, and Neuilly-le-Vendin. A red line traces the railway route, with a blue line indicating a specific section. Three inset photographs provide visual context: the top-left photo shows a straight section of the track next to a modern building; the bottom-left photo shows a track curving through a wooded area; the middle-right photo shows a track curving through a field with trees in the background.
